PROFESSIONAL SUMMARY

Full-Stack Developer specializing in the MERN stack with hands-on experience building scalable RESTful APIs, authentication systems, and production-grade web applications. Proficient in JWT-based authentication, role-based access control (RBAC), MongoDB schema design, and backend architecture. Proven ability to deliver zero-defect, high-impact projects and contribute to live production environments. Currently pursuing B.Tech in Computer Science & Engineering.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js
Databases: MongoDB, Redis, SQL
Tools & DevOps: Git, Postman, Docker, Kubernetes
Automation: N8N
Concepts: REST APIs, JWT Authentication, RBAC, System Design, Double-Entry Accounting Logic, Microservices

EXPERIENCE

Full-Stack Developer Intern

Jun 2025 – Aug 2025

Unlink Technology

Sector 132, Noida, India

- Collaborated with cross-functional teams to design and implement full-stack features, improving overall user experience across production web applications.
- Developed, tested, and maintained RESTful APIs using Node.js and Express.js to streamline data communication between frontend and backend services.
- Managed and optimized database operations in both MongoDB and SQL environments, strengthening data integrity and query performance in a live production setting.
- Contributed to the full software development lifecycle (SDLC) including code reviews, debugging, and deployment of production-ready features.

PROJECTS

Banking System | *Node.js, Express.js, MongoDB, JWT, RBAC*

- Architected and delivered a full-stack, secure banking system supporting core financial operations including deposit, withdrawal, and account-to-account money transfer.
- Implemented JWT-based authentication and role-based access control (RBAC) to enforce granular user authorization and protect sensitive financial endpoints.
- Designed a robust transaction engine using double-entry accounting logic, ensuring 100% data accuracy and auditability across all financial records.
- Structured MongoDB schemas with strict validation rules to maintain referential integrity and prevent data inconsistencies at the database layer.
- Delivered the project with zero critical bugs, demonstrating strong command of backend architecture, security best practices, and system design.

AI Resume Generator | *Node.js, React.js, N8N, Third-Party APIs, PDF Export*

- Built an end-to-end AI-powered resume generation platform that automatically produces structured, professional resumes from raw user input.
- Integrated third-party AI APIs and orchestrated automation workflows using N8N, reducing manual resume creation effort and enabling a fully automated generation pipeline.
- Implemented PDF export functionality to deliver polished, universally compatible resume outputs ready for immediate use.
- Designed a clean, responsive React.js frontend with efficient backend processing to deliver a seamless, production-quality user experience.

EDUCATION

Vivekananda College of Technology and Management

Aligarh, India

B.Tech – Computer Science & Engineering

2023 – 2026

Vivekananda College of Polytechnic

Aligarh, India

Diploma – Computer Science & Engineering

2020 – 2023

CERTIFICATIONS

The Complete Node.js Developer Course – Udemy	<i>2024</i>
React – The Complete Guide (incl. Redux) – Udemy	<i>2024</i>
MongoDB – The Complete Developer's Guide – Udemy	<i>2023</i>
Docker & Kubernetes: The Practical Guide – Udemy	<i>2024</i>

ACHIEVEMENTS

Delivered a full-stack Banking System with zero critical bugs, demonstrating strong backend architecture, security implementation, and data integrity practices.

Completed a 3-month full-stack development internship at Unlink Technology, contributing directly to live production features and RESTful API development.

Built and deployed an AI Resume Generator with N8N automation workflows, eliminating manual effort and automating the entire resume generation pipeline end-to-end.

Maintained strong academic performance throughout B.Tech Computer Science & Engineering program while simultaneously building production-level full-stack projects.
