PROFESSIONAL SUMMARY

Full Stack Developer skilled in React.js, Next.js, Node.js, Express.js, and MongoDB, with internship experience building RESTful APIs and working with MongoDB and SQL databases in a live production environment. Proficient in JWT authentication, role-based access control (RBAC), and backend architecture. B.Tech CSE graduate (2026), seeking a Full Stack / Backend Developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript
Full Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Microservices
Databases: MongoDB, SQL, Redis
Tools & DevOps: Git, GitHub, Postman, Docker
Automation & AI: N8N, Third-Party AI API Integration
Concepts: System Design, Double-Entry Accounting Logic, SDLC, Code Review
Familiar with: Kubernetes

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern Jun 2025 – Aug 2025
Unlink Technology, Sector 132, Noida, India

- Collaborated with cross-functional teams to design and implement full stack features for production web applications.
- Developed, tested, and maintained RESTful APIs using Node.js and Express.js to enable data communication between frontend and backend services.
- Managed and optimized database operations in MongoDB and SQL environments to maintain data integrity and query performance in a live production setting.
- Contributed to the full software development lifecycle (SDLC), including code reviews, debugging, and deployment of production-ready features.

PROJECTS

Banking System | Node.js, Express.js, MongoDB, JWT, RBAC

- Built a full-stack, secure banking system supporting deposit, withdrawal, and account-to-account money transfer.
- Implemented JWT-based authentication and role-based access control (RBAC) to enforce user authorization and protect sensitive financial endpoints.
- Designed a transaction engine using double-entry accounting logic to keep financial records accurate and auditable.
- Structured MongoDB schemas with strict validation rules to maintain referential integrity and prevent data inconsistencies.

AI Resume Generator | Node.js, React.js, N8N, Third-Party AI APIs, PDF Export

- Built an AI-powered resume generation platform that produces structured, professional resumes from raw user input.
- Integrated third-party AI APIs and automated the generation pipeline with N8N workflows, reducing manual resume creation effort.
- Implemented PDF export to deliver polished, universally compatible resume files.
- Developed a responsive React.js frontend backed by Node.js APIs for a smooth user experience.

EDUCATION

B.Tech – Computer Science & Engineering 2023 – 2026
Vivekananda College of Technology and Management, Aligarh, India

Diploma – Computer Science & Engineering 2020 – 2023
Vivekananda College of Polytechnic, Aligarh, India
